PROJECTS

Fake Review Detection System   **Machine Learning**

Fake Review Detection using supervised machine learning project, which helps to detect fake   Reviews from the massive collection of reviews.

ATM Software System   **JAVA**

I have created the ATM software using Object Oriented Programming in JAVA to deeply understand about the internal working of the software. This project clearly explains the internal working of ATM Software, how money is crediting or debiting from our bank account and how the money is fetched from our bank account and displaying error message if bank account is nil.

Organic Farming

It's a "**Community Service Project**", This project is part of my Academic Curriculum. Which brings awareness to the farmers about the Organic farming and usage of organic pesticides.
